

吴先生, 您好!

很高兴与您电话沟通, 根据沟通的结果, 我将暂时归档此问题。**案例归档后您会收到调查问卷的邮件, 希望可以对我们的服务进行评价。**

工单的归档并不会影响我们为您提供技术支持服务, 如果您的问题复现, 或有新的问题出现, 您也可以致电我们的技术支持热线 4008180055。

案例总结:

案例描述:

用户使用计算机过程中蓝屏, 已开启 NBL tracing。

案例进展:

和用户确认按照建议操作后蓝屏问题未再出现, 可归档案例。

CMIT:0001194

吴先生, 您好

很高兴与您电话沟通, 根据刚刚电话沟通的结果: 此 dump 是由于 PTE 结构损坏导致的。对于 PTE 损坏的问题, 操作系统是没有办法直接跟踪的, 所以只能通过收取多个日志来推测可能性原因。

建议操作:

1) 硬件方面: 查看现有 BIOS 和 Firmware 版本, 并进行升级;

2) 可以删除或者升级如下 filter driver 的组件:

	<u>TmPreFilter</u>	<u>TmPreFlt</u>	328500	Trend	FSFilter Anti-
Virus	<u>ffffc581b4d92ce0</u>	<u>4</u>			
	vSelfSafe	vSelfSafe_x64	385102		FSFilter Activity Monitor
	ffffc581b024a9d0	12			
	gscfmgr	gscfmgr	369000		FSFilter Activity Monitor
	ffffc581ab319140	4			

3) 如果客户后续有新的 dump 生成, 您可以回传后反馈此邮件。

日志分析:

=====

//bugcheck code 是 0x1a, 原因是 0x41792 - 表示 PTE 损坏。

//从 crash stack 中, 可以看到事情发生在 thread 退出的时候, 清理相关内存的操作。

2: kd> !mex.crash

CMIT:0001194

吴先生, 您好!

收到您上传的 2 个 dump 文件。

一、MEMORY.DMP 的 Call stack 与之前处理的 vwifimf.sys 问题不一致, 请确认这台机器出现蓝屏问题时的具体操作。

二、wangyifeng.DMP 分析结果和之前原因一致, 建议排查 vwifimf.sys。但我在运行需要 NBL Tracing 相关命令时遇到如下提示:

```

0: kd> !diskd.nbllog
This command requires NBL tracking to be enabled on the debuggee target
machine. (By default, client operating systems have level 2, and servers
have level 0). To enable, set this REG_DWORD value to a nonzero value on
the target machine and reboot the target machine:

HKLM\SYSTEM\CurrentControlSet\Services\NDIS\Parameters ! TrackNblOwner
Possible Values (features are cumulative)
* 0: Disable all tracking.
* 1: Track the most recent owner of each NBL (enables !diskd.pendingnbls)
* 2: Scan for leaks at runtime (use with StuckNblReaction)
* 3: Keep a full history of all activity (enables !diskd.nbllog and
!diskd.nbl -log)
* 4: Take stack capture snapshots (slow, but enables !diskd.nbl -log
-stacks)
This command requires level 3 or higher.

```

还请确认 HKLM\SYSTEM\CurrentControlSet\Services\NDIS\Parameters 界面 TrackNblOwner 是否设置成功。可反馈截图给我进行确认，如果没有设置成功请以管理员身份运行命令提示符，运行如下命令：

```
reg add "HKLM\SYSTEM\CurrentControlSet\Services\NDIS\Parameters" /t REG_DWORD /v
TrackNblOwner /d 4 /f
```

wangyifeng.DMP 分析过程：
